Confidential Computing

Case story

Statistics Denmark – The central authority on statistics of personal and socio-economic data

The Danish Health Data Authority – Collect, process and protect data on healthcare treatments and medicines consumption

NO DATA SHARING

Step 1: Establish virtual data set

- Secret sharing DST and SDS data, each node only holds anonymized data

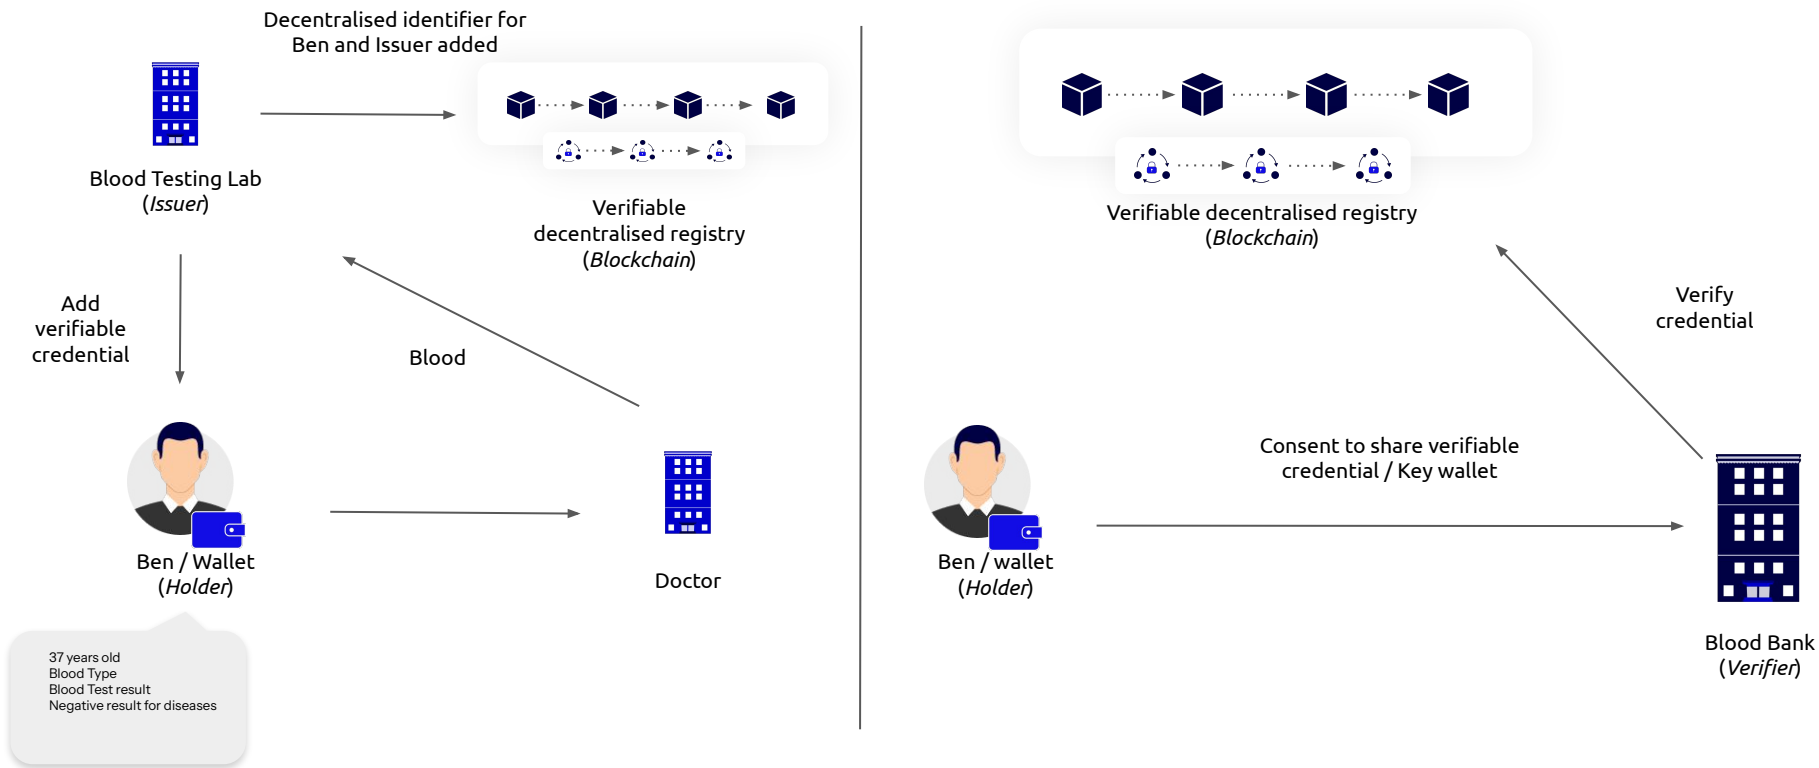

Step 2: Use virtual data set

- Data sent to opponent is completely anonymised data
- Adversary tapping all communication learn nothing

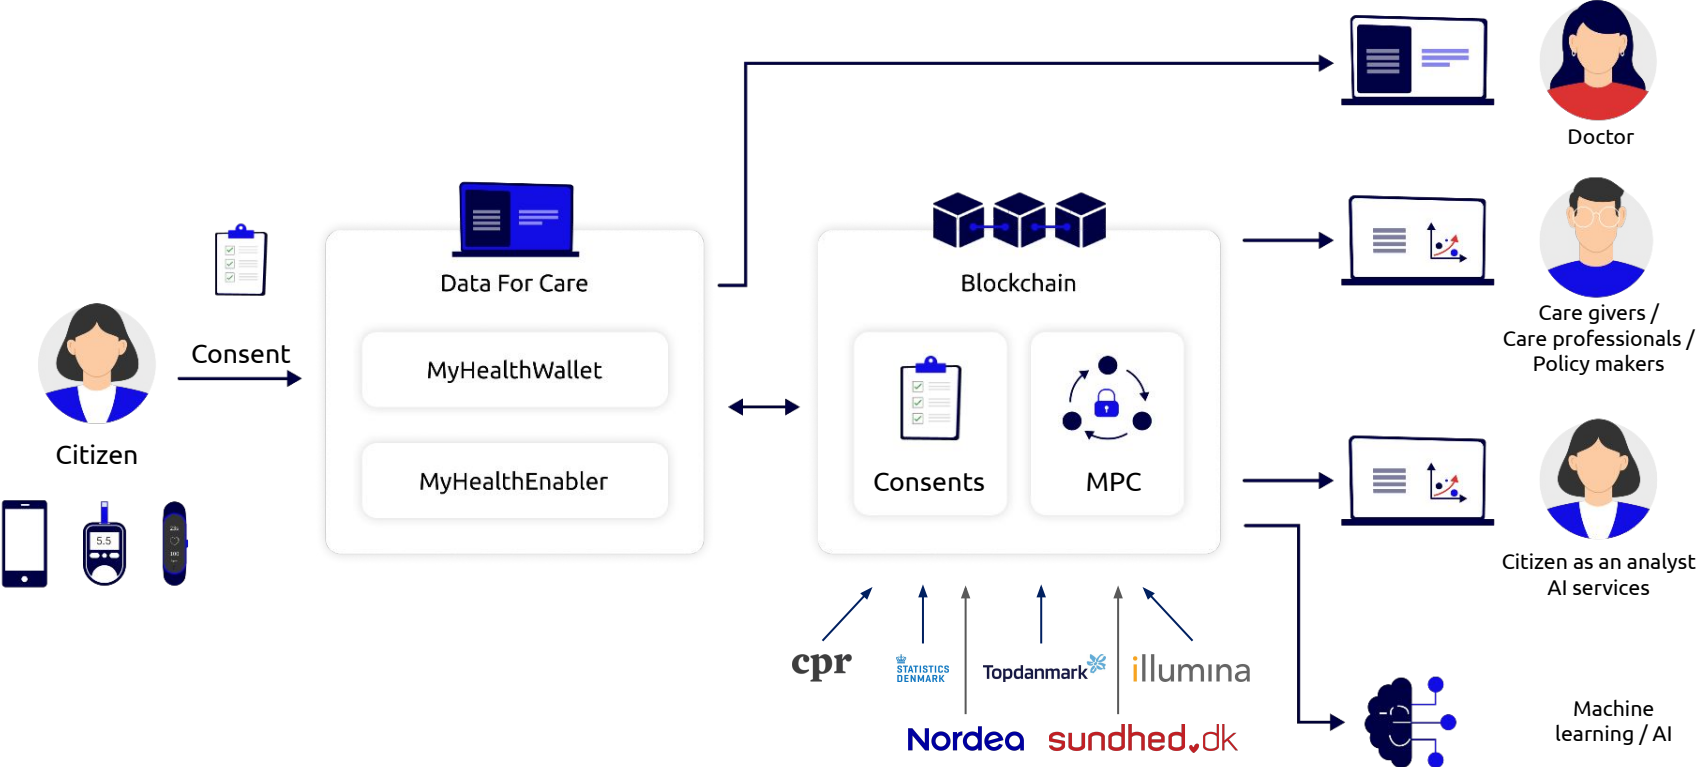

Step 3: Share result

- Only approved result is shared with analyst

Decentralized identity and verifiable credentials

New standard for health data
