# The GUARD FAMILY

## Hyperguard

**HC** Hyperguard is detecting metal objects and includes trolley filter and accounts for all items at time alarm.

Hyperguard is the customer product designed to detect counterfeits in supermarkets.

Since 1980 the Hyperguard antenna has been installed in supermarkets challenged by counterfeits. Our patented detection is integrated into the Hyperguard algorithm. False alarms or false alarms from trolleys never happen.

Hyperguard also includes a professional filter to minimize all alarms from shopping trolleys.

The antenna can be integrated into RF EAS systems, and each controller will automatically adjust it self according to RF or EAS environments.

The cables for installation, are Cat5e, cutting power from the controller to maximum 11 antennas. The cables are included in the boxes.

With over 100,000 antennas installed worldwide, our products are widely used by all types of retailers.

The products are made in Europe and of high quality materials.

**Antenna distance:**

**120cm antenna:** Max antenna maximum distance 3.00 meters

**180cm antenna:** Max antenna maximum distance 3.40 meters

**240cm antenna:** Max antenna maximum distance 3.00 meters

**EAS integration:** Hyperguard into RF antennas is also an option, and antenna distance depending on antenna width.

## Apparelguard

**AG** Premium Magnetdetection

Apparelguard is installed in fitting rooms and is designed to detect magnets.

Apparelguard is a cutting edge technology of detecting the magnetic field in the fitting room.

Apparelguard uses the same high-end technology as Hyperguard and Hyperguard.

Apparelguard is installed in the fitting rooms in most shops all over the world. Typical locations are where the customer can change clothes. These locations are used to detect the magnet.

The cables for installation, are Cat5e, cutting power from the controller to maximum 11 antennas.

Using wireless coding, all types of magnet detection can be detected.

The products are made in Europe and of high quality materials.

**Antenna distance:**

**Hyperguard antenna:** maximum distance 3.40 meters

**Each controller can power maximum 11 antennas, depending on fiting room.**

Customers can use 3 day delay contacts as alarm output, for light, sound, power or 24V DC, or push the alarm to their cell phones using GPRS.

The products are sold globally, and we support all installations with manuals in 14 languages.

1. English
2. German
3. Spanish
4. Spanish
5. Italian
6. French
7. Russian
8. Portuguese
9. Chinese
10. Hindi
11. Arabic
12. Japanese
13. Chinese
14. Arabic

Please read the user manual before installing as you will make your installation better more prepared and precise, when needed.

Please go to the Apple store and download the phone and pad, type in "AlertSystems".

Shopguard delivers the latest in metal and magnet detection for customer friendly retail environments.

## Apparelguard

Customer-friendly Fitting room Security

The most advanced magnet detector in the industry. Detects the use of magnet, not the presence of a magnet. Specific cubicle identified with silent alarm, staff alerts. No visible fitting room entrance security

## HyperGuard

Customer-friendly Metal Detection

The most advanced entrance metal detector on the market. Filters specific metals, allows through trolleys. Silent/audible alarm option. Slim, attractive antenna aligned with EAS or RFID security antennae.

# ApparelGuard

Customer-friendly Fitting room Security

- ApparelGuard utilizes **double detection** to create highly accurate and relevant magnet detection. It focuses on illegal use of magnets to remove RFID or EAS tags within fitting rooms. It does not alarm at magnetized products carried innocently by shoppers.
- Low profile detectors. One per fitting room cubicle.
- One controller can power up to 10 fitting rooms
- Alarm output options: Lights, Pager, Audible Alarm, CCTV or push to EAS via API.

# HyperGuard

Customer-friendly Metal Detection

- HyperGuard detects foil-lined booster bags, but uses trolley filter and door filter to eliminate false alarms common with other systems.
- Low profile antenna. Plexiglas. Aligned with existing EAS or RFID antennae.
- Works with all EAS or RFID antenna. Does not require SG EAS systems
- HyperGuard targets the organized theft gangs who bypass EAS and RFID security
- Eliminates x 2 theft v use of RFID or EAS gates alone.

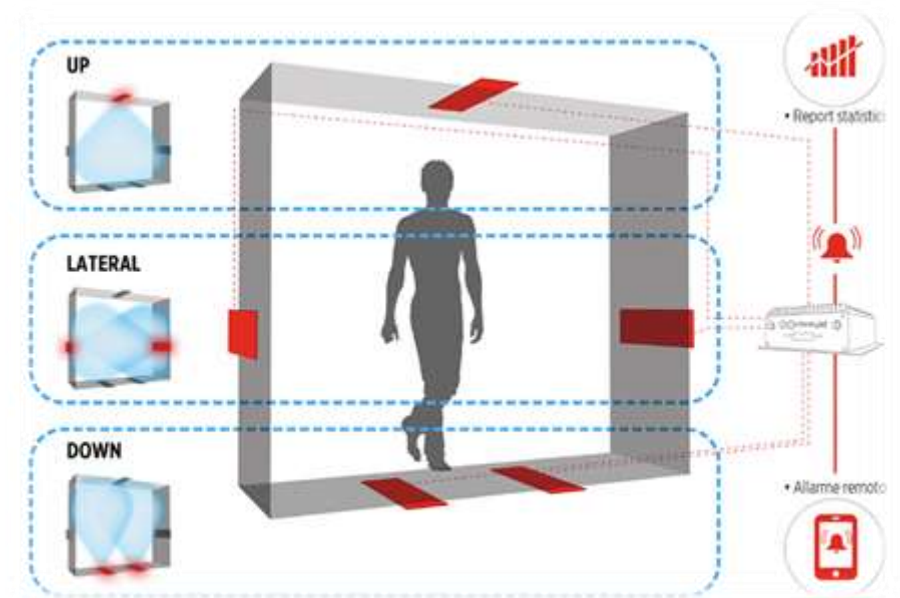

*Shopguard Twilight EAS and HyperGuard installation*

# RFID SECURITY SYSTEMS

European Design . Global Performance

- Store security systems that fit new retail supply chain tagging systems.
- Sleek, visible
- Or hidden, invisible

# EAS SECURITY SYSTEMS

European Design . Global Performance

- RF security technology built for performance and design
- Chosen by retailers across the world
- Remote Management Software for full visibility and control

# MERCHANDISING SECURITY

European Design . Global Performance

- Proud APPLE partner
- Vendor to SAMSUNG Global
- And to many telco stores globally
